ALL

Here's my understanding and our message to those who ask. Please modify as you think appropriate.

1. The meetings are not open to the public.
2. The subcommittee is NOT decisional and all products, ideas, options, and recommendations will be deliberated upon by the full Committee, and thus, in a public meeting.
3. We are not encouraging it, but a Committee member could observe the subcommittee if they wished to do so. If there were more than a few observers, I think we would seek to address that to keep the subcommittee meeting frank, small, and focused.
