ALL

Walker pulled out for me the one page table from a larger report/study on seasonality of shorebirds. Here it is and I think folks have the whole study from an earlier email.

PAT

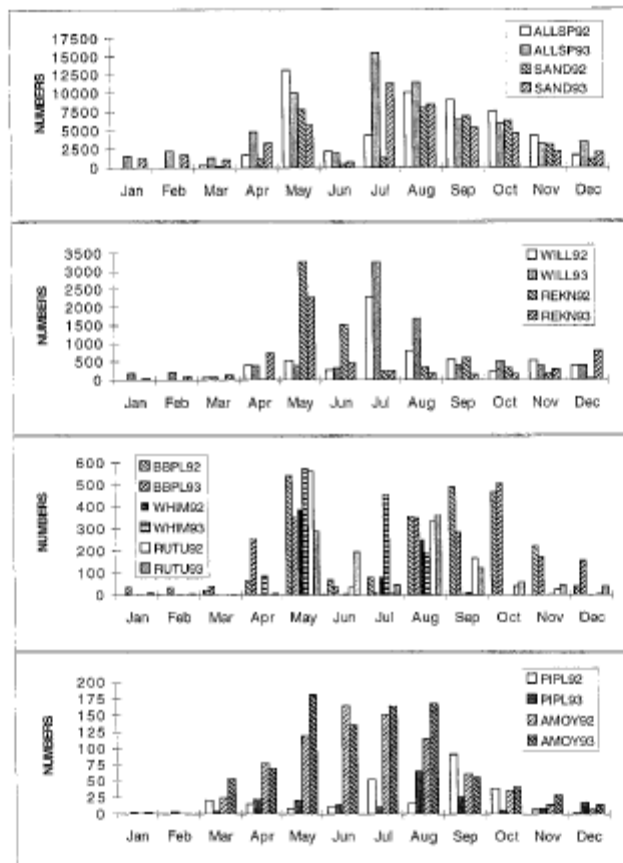

FIG. 2. Numbers of the shorebird community (ALLSP), Black-bellied Plovers (BBPL), Piping Plovers (PIPL), American Oystercatchers (AMOY), Whimbrels (WHIM), Ruddy Turnstones (RUTU), Red Knots (REKN), and Willets (WILL) detected on beach censuses on the Outer Banks of North Carolina, March 1992–December 1993.
